

EXISTING SYSTEM (without Middleware)

EXISTING SYSTEM (without Middleware)

- 1. Duplication of Bussiness Logic**
- 2. Complicated desing and coding**
- 3. Overhead of other project's domain knowledge for developer / tester**
- 4. Difficult when change comes in bussiness logic**

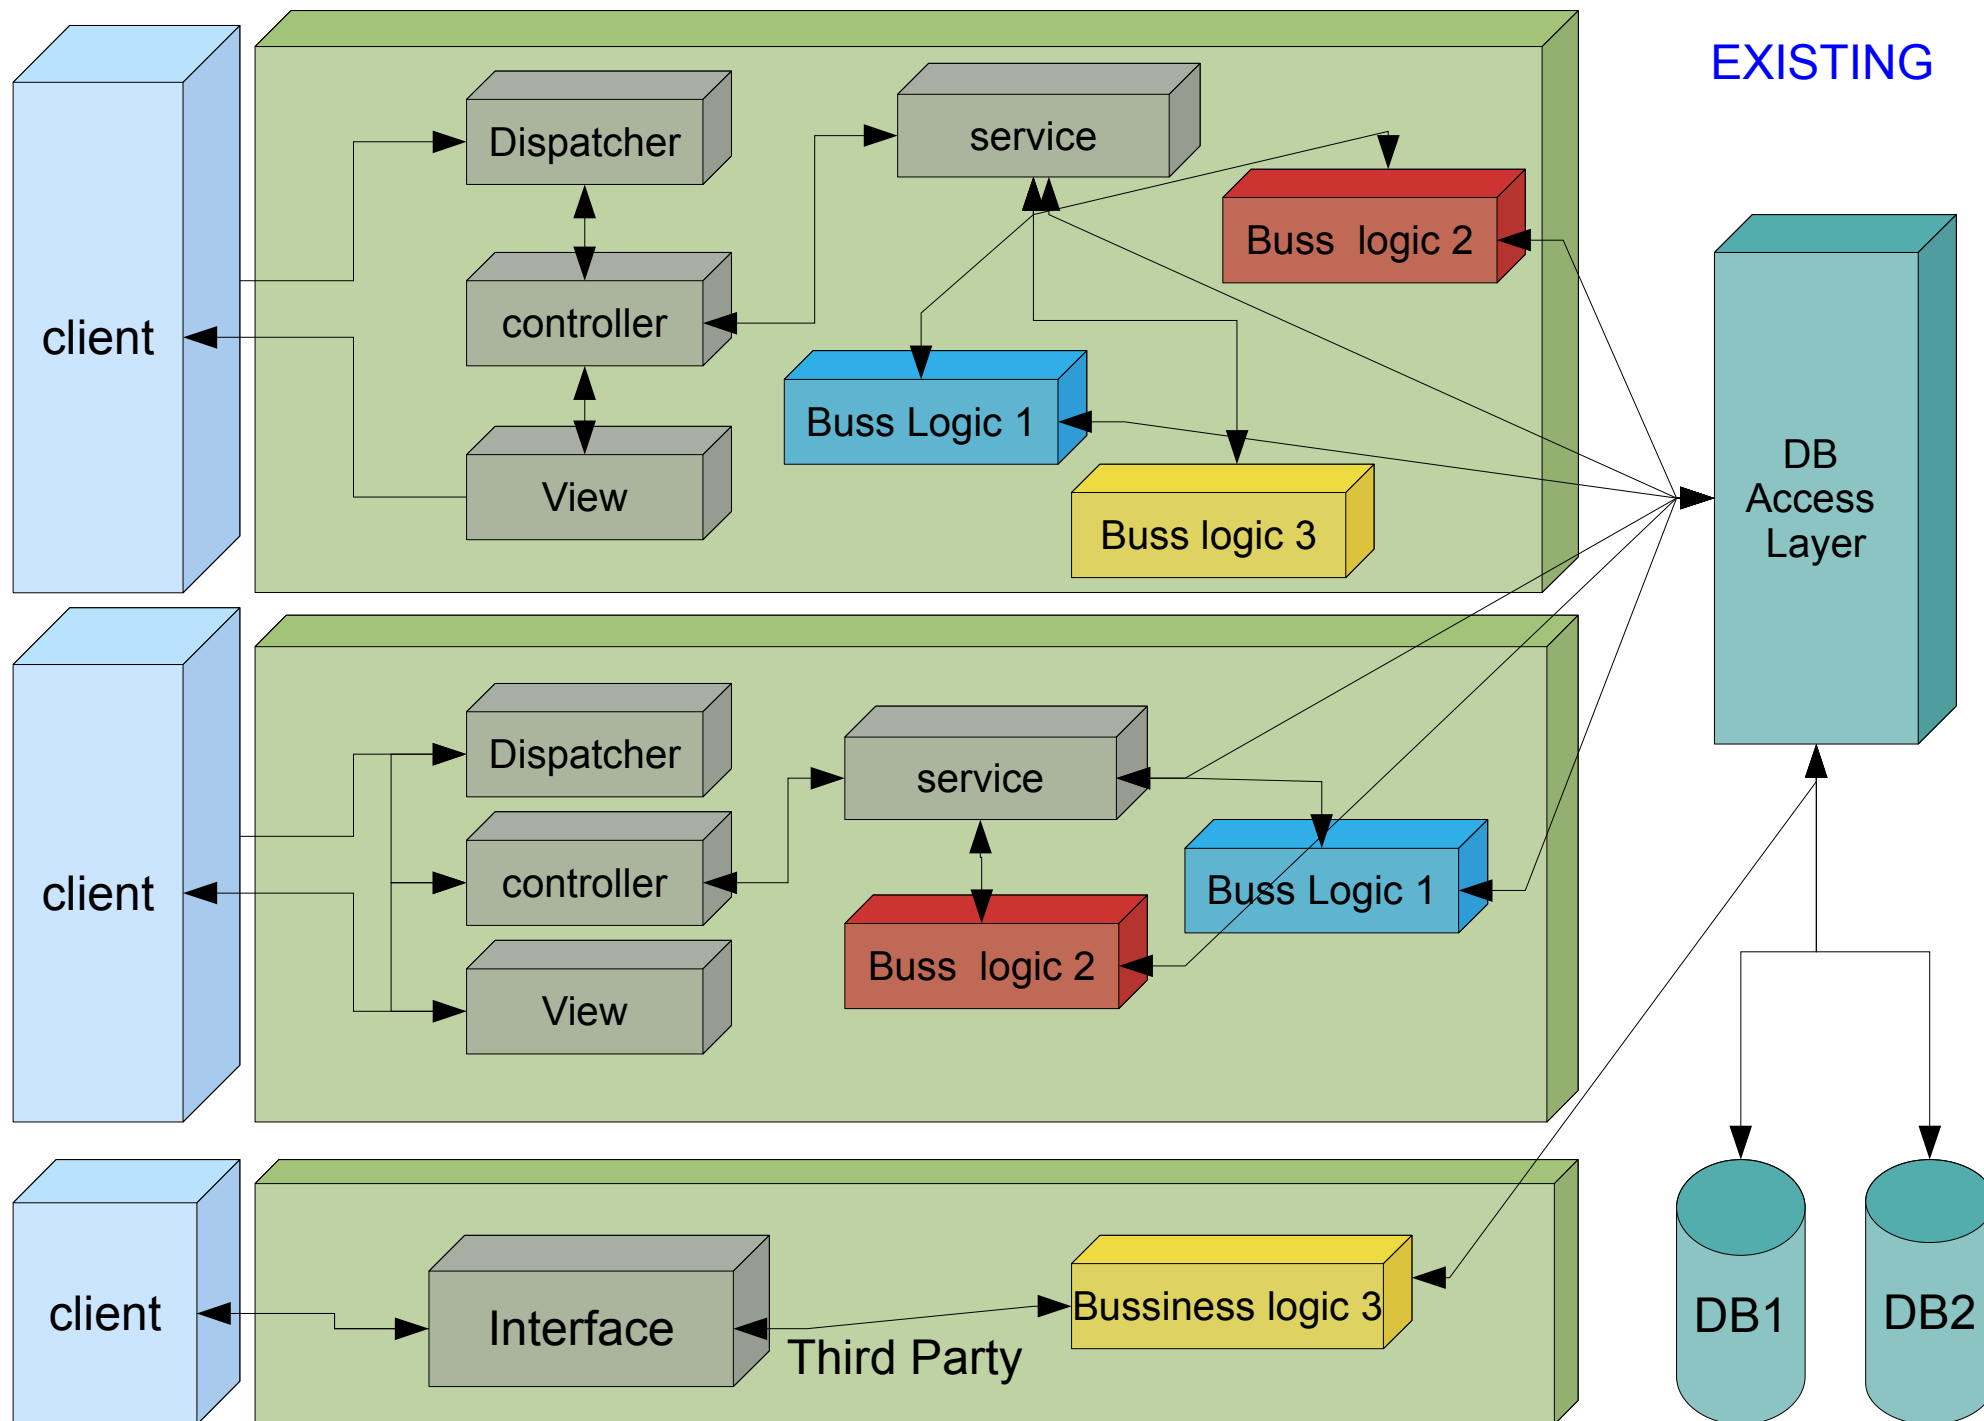

NEW SYSTEM (with Middleware)

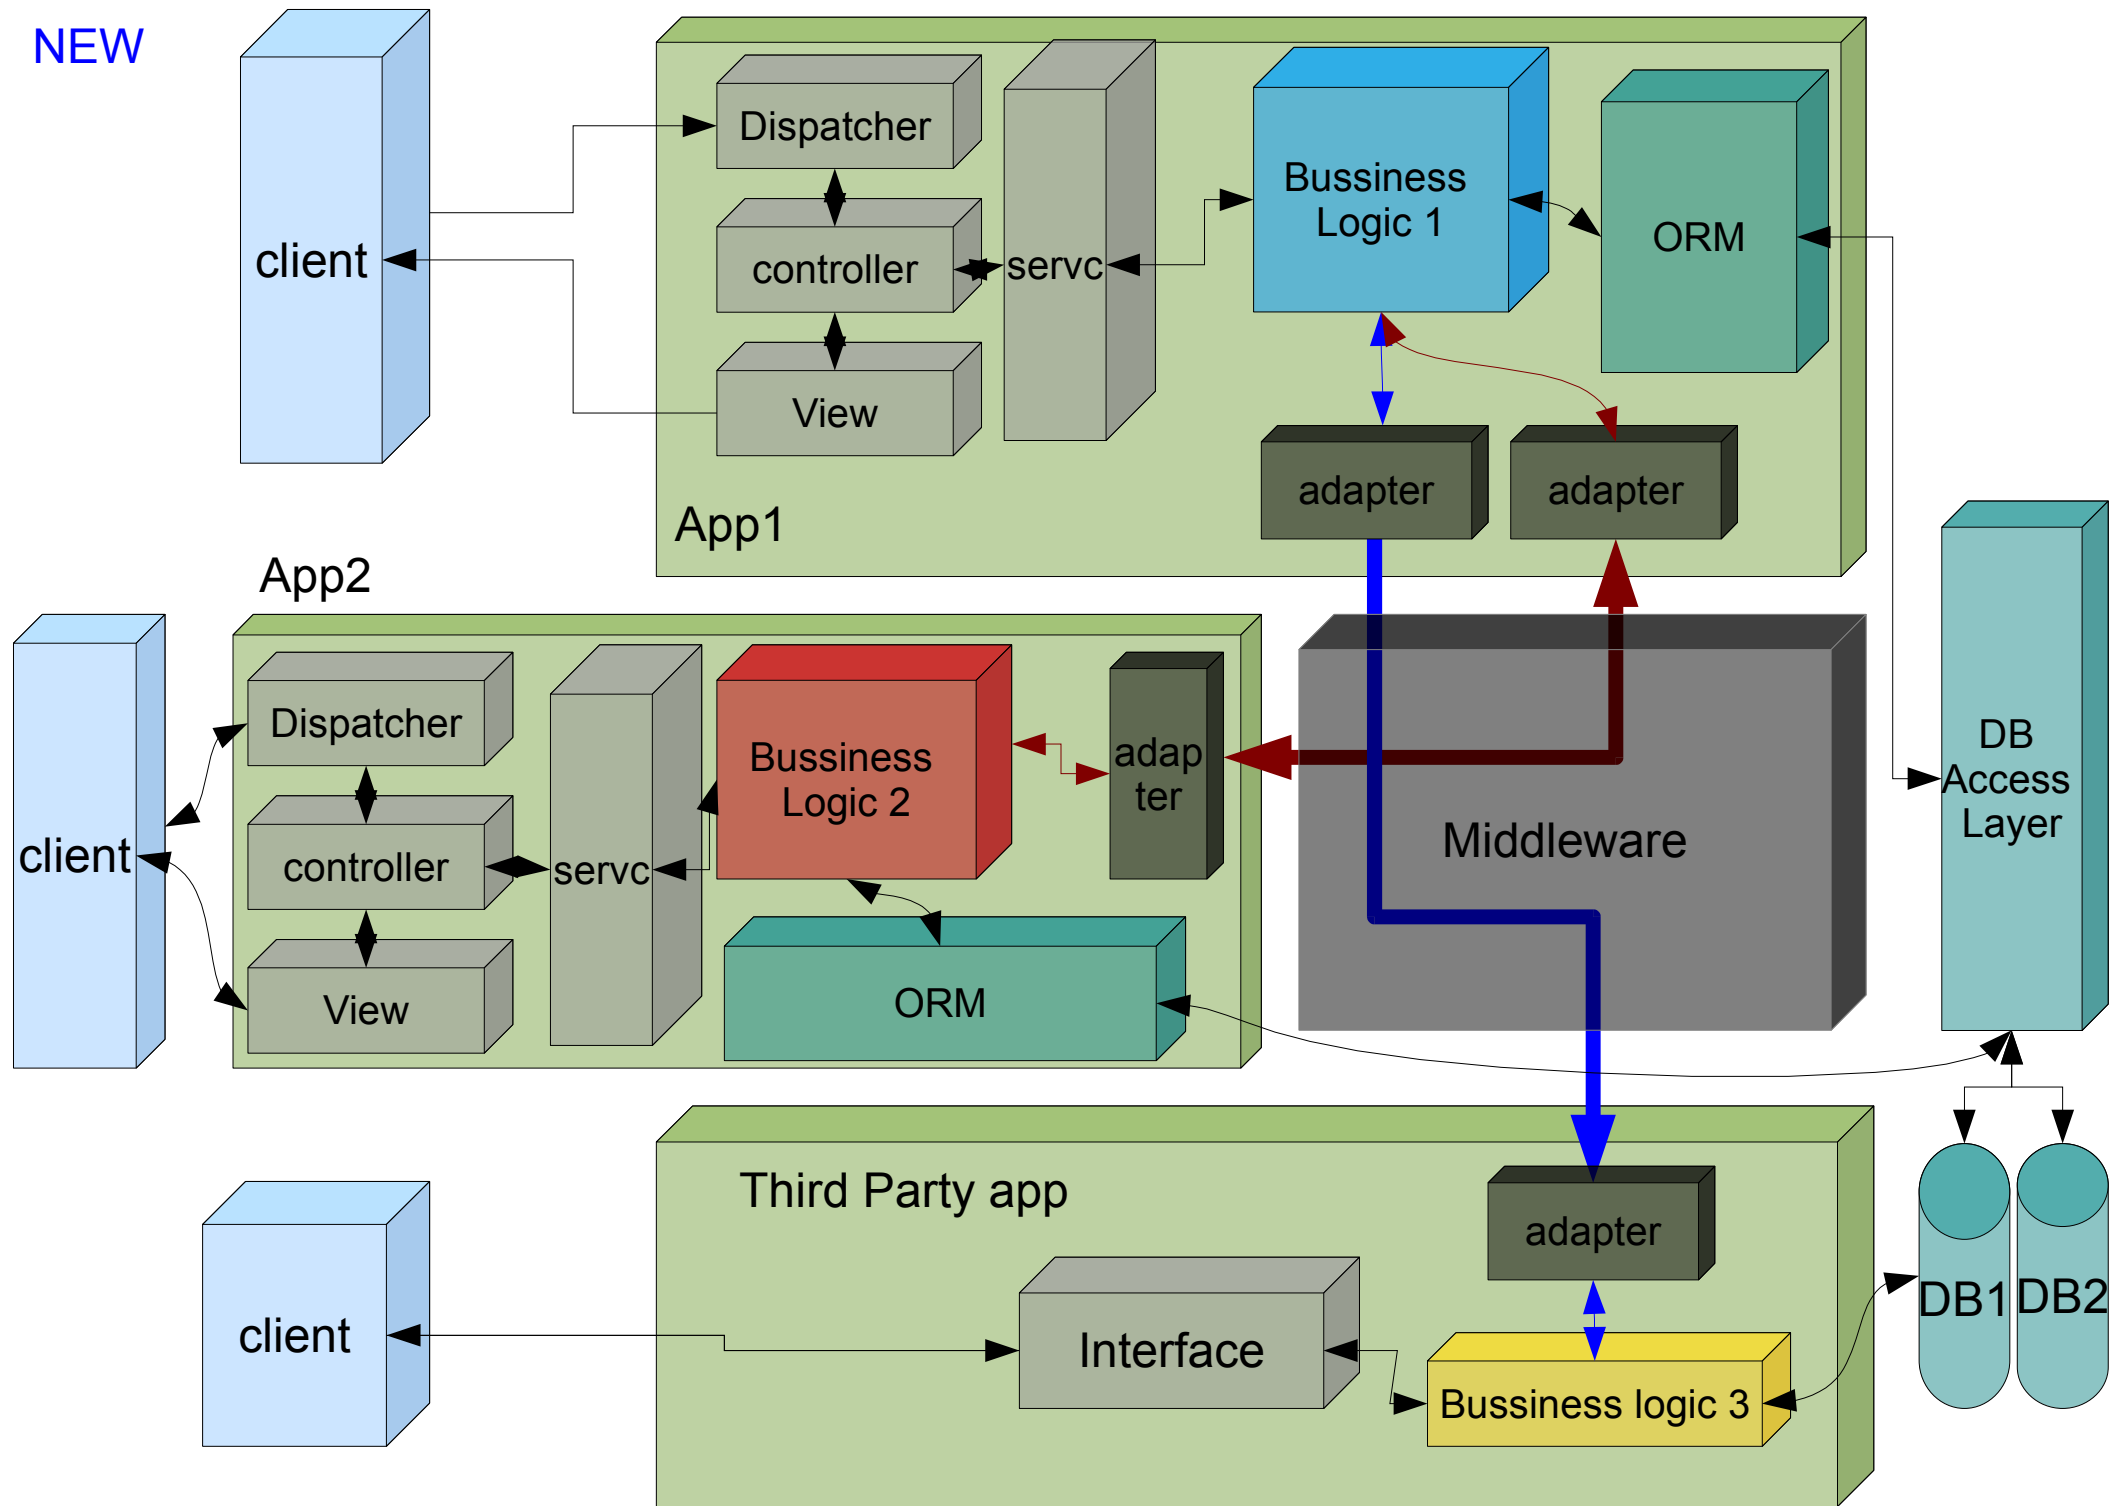

NEW SYSTEM (with Middleware)

- 1. Centralized Bussiness Logic**
- 2. Simple desing and coding**
- 3. Domain experts handles their application's logic**
- 4. work only needed where change in business logic actually occure which does not affect other applications using that logic**
